

Kahua for Healthcare

Developing Vital Structures

Healthcare facilities nationwide bear the weighty responsibility of providing secure, nurturing environments for patients' well-being. Hospital administrators face the ongoing challenge of adapting swiftly to evolving healthcare needs, ensuring facilities remain safe and compliant while juggling diverse funding sources and meeting program deadlines.

Amidst the pressures of aging infrastructure, population surges, regulatory demands and unforeseen crises, the task of managing capital programs in healthcare is exceptionally demanding.

The complexities inherent in healthcare capital programs present unique hurdles. Organizations must manage both large, complicated projects and smaller ones, ensuring effective oversight and integration into their overall plan. Administrators face challenges such as navigating cost overruns, maintaining visibility into project risks and opportunities, and orchestrating funding from multiple sources. Given the microscope that healthcare institutions are under, administrators must operate with complete transparency, subject to scrutiny at every turn.

Healthcare capital projects unfold across multiple phases, involving many stakeholders and contributors. From constructing new facilities to maintaining existing ones, the scope of work is vast and intricate. Managing the infrastructure of hospitals, clinics, and medical centers within a single healthcare system is a monumental endeavor, demanding meticulous coordination and unwavering commitment to quality care.

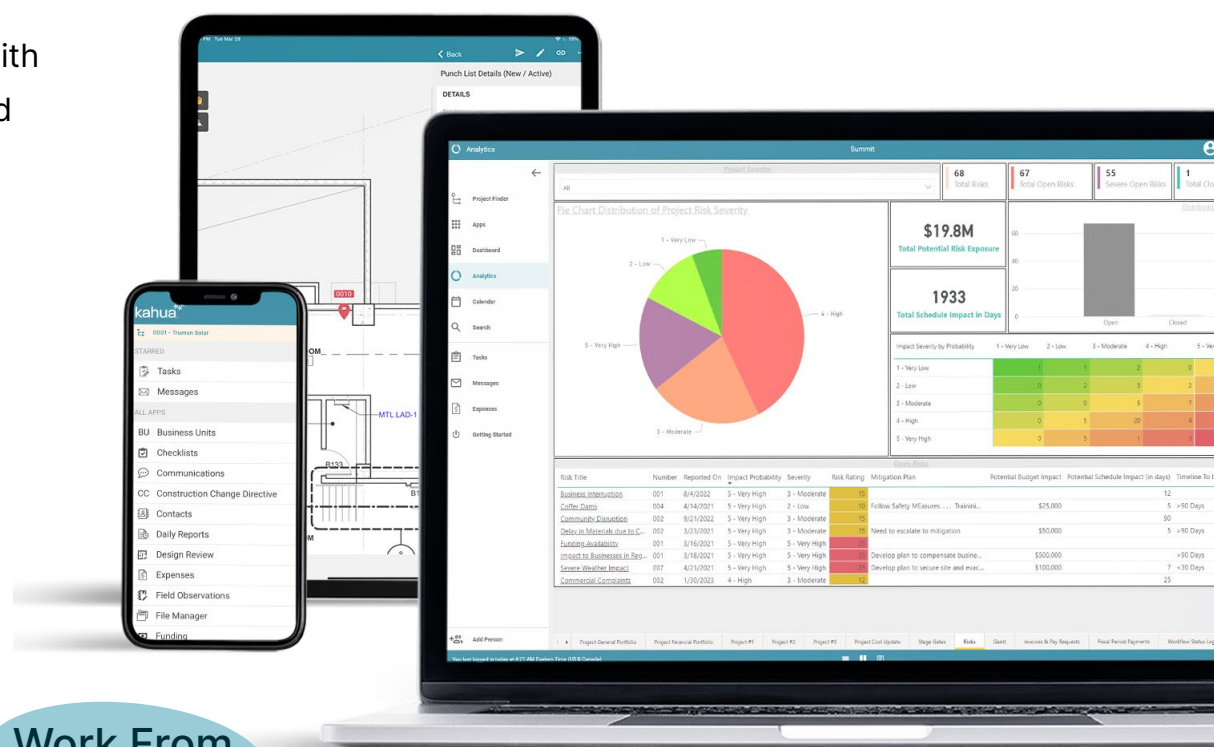

Kahua for Healthcare Package

Kahua for Healthcare is a [Project Management Information System](#) (PMIS) crafted specifically for the healthcare industry. Designed to meet the unique needs and challenges of healthcare organizations, Kahua for Healthcare is transforming the way hospitals, clinics and medical facilities manage their capital programs with unparalleled efficiency and effectiveness.

From project scope and budget management to scheduling, quality control and strategic objectives alignment, healthcare systems can seamlessly oversee the entire lifecycle of construction and renovation projects with Kahua. With a focus on creating spaces optimized for patient care and operational excellence, Kahua for Healthcare empowers organizations to navigate complex projects with confidence.

With specialized functionality, customizable workflows and insightful analytics, Kahua for Healthcare equips providers with the tools they need to drive successful project outcomes and enhance patient experiences.

Work From
Any Device

Capital Planning

Create optimized capital plans right from your project management tool to efficiently prioritize and forecast potential and current projects for multiple year capital plans over defined periods based on standard or custom curves.

Cost Management Suite

A collaborative suite of applications designed to simplify the creation and management of budgets while giving real-time visibility and control to manage commitments and change through the lifecycle of capital projects.

Cash Flow Forecasting

Create a cash flow that is broken down granularly and forecasted based on the specifications determined by your organization.

Healthcare Suite

Designed to address issues specific to the challenges of healthcare construction projects – from hospital construction to medical centers, clinics and more.

Datastore

Easily access data to combine with other data sources to run analytics in whichever business intelligence software is used.

Kahua Analytics

Powered by Microsoft PowerBI and gives the ability to access data with powerful dashboards readily available both out-of-the-box and with flexible configurations for business needs.

Document Management Suite

A collaborative suite of applications designed with flexibility and automation to effectively manage key processes within construction projects. Process documents, drawings, models, specs and files. All applications can be configured to capture only relevant information to project requirements, making data entry highly efficient. All workflows can also be designed to support project governance and timelines. Each application has out-of-the-box reports that create easy and timely data retrieval.

Portfolio Manager

Easily see various aspects of the portfolio of projects being managed.

Snapshot

Create an archive of data, records, files and attachments within a project from anywhere in the Kahua platform at any time.

Choose Kahua

Kahua is a leading provider of capital program and construction project management software, enabling innovation that is changing the way that capital programs are planned and delivered. Global organizations use Kahua's collaborative solution to improve efficiency, lower costs and reduce project risk throughout the entire lifecycle of their capital programs. Our purpose-built solutions for owners, program managers and contractors enable rapid implementation that minimizes time-to-value and enhances user adoption. With the industry's only low-code application platform, customers can easily customize existing Kahua apps or even build their own new apps to run their business at peak efficiency today and rapidly adapt as business conditions dictate.
