

K-12 Facility and Planning Teams Are Struggling to Make the Grade

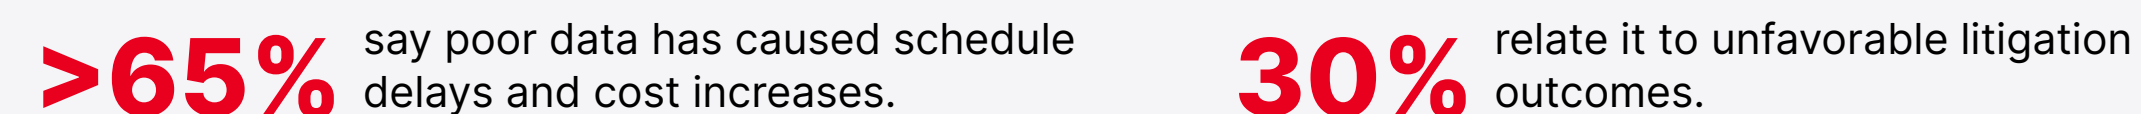

State of the Industry

System Used to Manage Planning

Poor Data Degrades Outcomes

Purpose-built Platform Helps Schools Optimize Construction

Kahua is the only [program management information system](#) (PMIS) with a purpose-built solution designed for the education industry. [Kahua for Education](#) has functionality, workflows and analytics built specifically for school districts. You can be up and running in 90 days or less, connect your data and easily train your users with these standard best practices built in:

- Set up projects for local and state audits
- Streamline the dynamic management of funds across programs and projects
- Build a multi-year program in a fiscal year system
- Effectively communicate with the board and other key stakeholders with built-in-state specific reporting requirements
- Free up the program team to run the programs vs spending time with data entry and running around looking for numbers
- Track and manage assets at the beginning of a project for a seamless, digital handover to operations
