

Facility Condition Assessments

Dynamic. Efficient. Real-Time.

Owners and teams often struggle to maintain up-to-date information on the condition of their assets, relying on outdated methods and disconnected asset information. This leads to time-consuming and costly assessments of assets, increased operational risks, safety and compliance issues, as well as inefficient proactive maintenance.

Enhanced Preventive Maintenance

Centralized Asset Record

Reduced Operational Costs

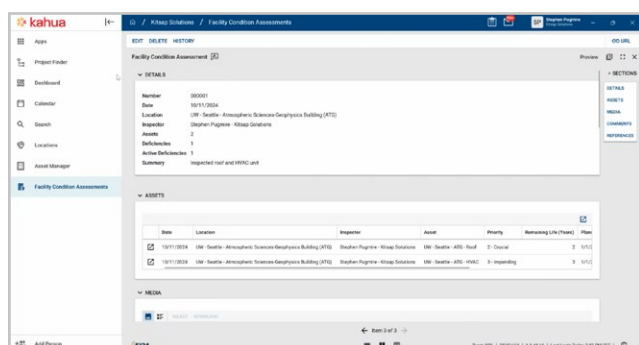

Streamlined Compliance

Optimize Your Facility Assessment

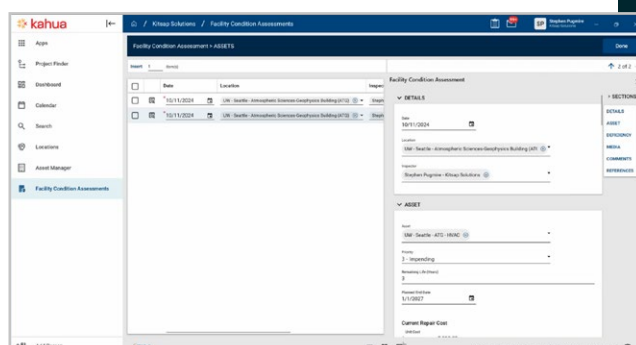

Kahua's Facility Condition Assessments (FCA) app automates the FCA process by providing a dynamic, real-time record of asset conditions throughout the construction lifecycle and beyond. The FCA app enables teams to monitor asset deficiencies, track preventive maintenance and update asset data as needed, delivering a comprehensive, flexible solution that adapts to the unique needs of owners.

Discover how Kahua's Facility Condition Assessments (FCA) app will **optimize facility investment strategy**, providing real-time insights, cost savings and enhanced preventive maintenance while minimizing risks. Kahua's comprehensive solution ensures facilities operate at peak performance.
