Streamline Projects, Deliver Defense Contracts with Confidence

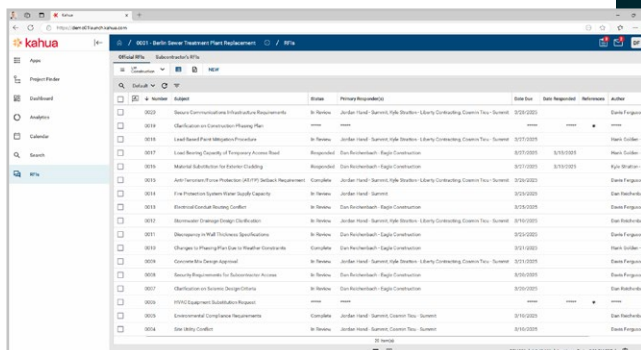

Kahua for General Contractors, a FedRAMP-authorized construction management platform, enables you to win and retain DoD Contracts. Secure Controlled Unclassified Information (CUI) across the project lifecycle, such as drawings and contracts, while gaining a competitive edge through our purpose-built platform for defense contractors. Streamline costs, boost project efficiency, enhance collaboration with teams and subcontractors with a CMMC-compliant, out-of-the-box solution to get you up and running in days.

Discover how Kahua for General Contractors can transform your business with a CMMC complaint platform that will streamline workflows, improve project visibility and enhance collaboration across teams and subcontractors. Stay competitive and stay compliant.

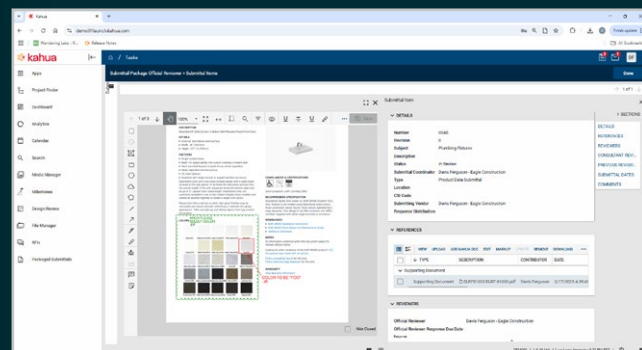

Actionable RFI Insights

Secure CUI Support

Enhanced Submittal Review

Kahua for General Contractors

Free CMMC Readiness App

- Accelerate your CMMC certification journey with pre-loaded controls covered by Kahua
- Easily upload documentation to support evidence of compliance to the requirements
- Enhance audit support for your CMMC consultants

Analytics and Reporting

- Standard out-of-the-box reporting dashboards that transform complex data into actionable insights.
- Real-time visibility into win/loss, project status updates, and budget performance.
- Instant access to profitability analysis across your entire project portfolio.

Checklists and Inspections

- Build custom inspection checklists with an easy-to-use form builder
- Easily schedule and manage asset inspections across all your projects
- Capture issues and track resolutions to proactively manage asset performance and project quality

Document Management

- Centralize all communications with corporate standards.
- Secure document storage with controlled, auditable access.
- Manage critical business processes with easy to use workflows for submittals, punch lists, and RFIs.
- Document field observations, design review, daily work, and progress updates.
- Capture job site activities and conditions in consolidated daily reports.

Cost Management

- Define work breakdown structures (WBS)
- Control project budgets and budget changes
- Track funding and expense contracts and change orders down to the schedule of values
- Support invoices and pay requests
- Compare and review budget vs actuals to project remaining costs on a project
- Leverage forecasting to predict remaining labor and material expenses
- Adequately analyze profitability per activity code

Safety Suite

- Maintain OSHA 300 & 301 reports for filing and compliance.
- Streamline reporting, minimize legal risks, and strengthen safety protocols.
- Track and manage employee training and certifications with ease.
- Identify patterns, enhance safety and reduce liability.
- Centralize incident reporting to mitigate safety risks and financial loss.

CUI Management

- Safeguard Controlled Unclassified Information (CUI) such as designs, contracts, layouts with FedRAMP's rigorous security controls and encryption standards.
- Enable protected collaboration on sensitive documents while facilitating necessary information exchange.
- Leverage built-in compliance tools that continuously monitor CUI handling practices against DoD requirements.

"We looked hard for a company like Kahua that takes security as seriously as AVCOR does. Even where CMMC isn't required yet, our customers will get the benefits of cybersecurity protection from Kahua's CMMC-certified construction management platform. We are staunchly protecting our customers' data, even if they don't know it. We're future-proofing data for them."

Lee Price | President, AVCOR Construction
