

Is Your Federal Construction Management Solution **Checking All the Boxes?**

Complex federal construction projects need an easy, modern and unified project management solution for success. Whether you're handling maintenance, refits or new builds, your system should provide clear oversight, streamline processes and keep stakeholders informed every step of the way.

Here's a checklist to help ensure your construction project management solution is the right fit:

Project Scope & Flexibility

- ☐ Can manage projects of all sizes
- ☐ Supports lifecycle management: Planning | design | construction | handover
- ☐ Provides flexibility to configure for issues, change requests, change orders
- ☐ Provides asset centric project management capabilities

Funding, Budget & Cost Management

- ☐ Manages multiple sources of funds: appropriation
- ☐ Manages individual project budgets and costs
- ☐ Integrates with agency's additional tools (finance & contracting solutions)
- ☐ Can roll up multiple projects into program-level budgets and costs
- ☐ Has project top-down/bottom-up visibility for real-time financial oversight

Data Management & Reporting

- ☐ Offers configurable, drill-down dashboards & reports for project tracking
- ☐ Eliminates need for data entry into multiple systems
- ☐ Enforces standardized processes on one platform for internal & external users
- ☐ Use out-of-the-box or build your own dashboards with built-in Power BI
- ☐ Integrates with permissions

Contract Administration

- ☐ Provides mobile access to contract for flexibility
- ☐ Contract management allows for collaboration
- ☐ Owner system provides scope management
- ☐ Schedule management
- ☐ Field quality
- ☐ Field safety
- ☐ Handover, closeout & warranty

Security & Compliance

- ☐ Ensures federal-level security standards with [FedRAMP Authorization](#) & CMMC 2.0
- ☐ Is hosted on government community cloud vs public cloud
- ☐ Has federal agency ATO process experience

Avoid the conflicts of interest that can arise when relying on contractor-provided software tools. Kahua is built specifically for federal owners, offering a tailored solution that gives your agency full control of its projects, data and processes. With Kahua, your interests are always the priority.

Schedule a demo to see how you can streamline your federal construction projects and why Kahua is trusted by your peers.

Choose Kahua

Kahua is a leading provider of asset centric construction project management and analytics software for government, healthcare, education, commercial and energy sectors. Our platform – the most secure in the industry – helps organizations improve efficiency, reduce costs and manage risk across the entire project lifecycle for owners and contractors, which also allows for a streamlined project handover process. With rapid implementation and a low-code environment, users can easily customize or build apps to meet evolving business needs.
