Unified Project Management for Owners and General Contractors

Benefits	Separate Instances Provide	Outcome
- Enhanced collaboration - Data integrity - Project efficiency - Single source of truth	- Tailored workflows - Data control and security	- Synchronized information - Reduced miscommunications - Improved decision-making

Customer Testimonials

"We don't have to over-communicate any more. We used to address five people on an email in hopes that it gets to the right person. In Kahua, the message automatically goes to the right person. It's more efficient communication that can't get lost in an inbox."

– Jessie Grider, Construction Project Manager, Red Wing Shoes

"We wanted something out of the box but at the same time, we didn't want something that was completely rigid. So, the ability to enhance the application to do specifically what you need, alongside the requests... to put some general enhancements across the board out there... We wanted to enhance some processes, and then also build out some new ones and drop some old ones."

– Austin Buege, Senior Manager of Real Estate Consolidated Systems, Floor and Decor

Why Choose Kahua?

Usability: Collaborate across stakeholders in a single system with a modern, intuitive interface.	Flexibility and Agility: Rapidly deploy programs with pre-built or customizable processes and leverage innovative hierarchical configuration to tailor solutions.	Scalable Enterprise PMIS: Adapt to market changes, regulations and stakeholder needs.	Data Security: Robust permissions framework ensures secure access control.	Integrations: Reduce costs and drive efficiency by eliminating point solutions with API integration that unlocks siloed data.
