

Vendor Management Suite

Optimize. Monitor. Measure.

Developers and owners have long shifted delay and default risk to vendors, bonds, and insurance — but this only works with high-performing, capable vendors. Today, lenders and sureties increasingly emphasize rigorous vendor selection, urging teams to assess each vendor's strengths, weaknesses, capacity, and capabilities, and to continuously measure and monitor performance to avoid overload and reduce project risk.

Recruit and Vet Potential Vendors

Determine Vendor Capacity

Rate and Analyze Vendor Performance

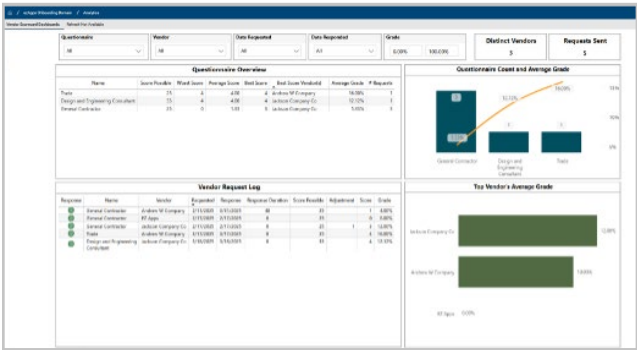

Manage and Develop Vendor Relationship

Manage Vendor Certifications (LEED, CCM, etc)

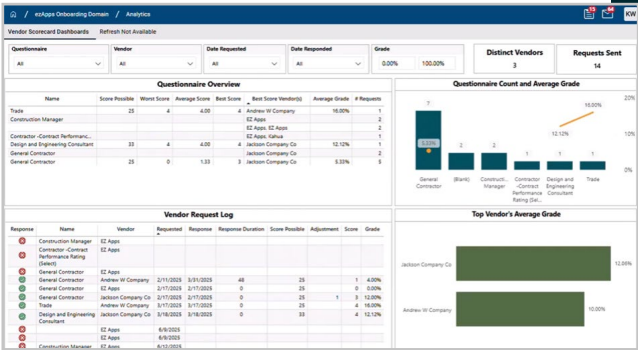

Evaluate Vendors to Fit Your Business Needs

The Vendor Management Suite streamlines the full vendor lifecycle—from qualification to performance—by centralizing vendor data, configurable questionnaires, and controlled communication. It separates internal and external views to protect information, improves efficiency, reduces costs, and strengthens compliance and risk management. The suite gives organizations comprehensive control over vendor management while minimizing operational overhead and technical dependencies.

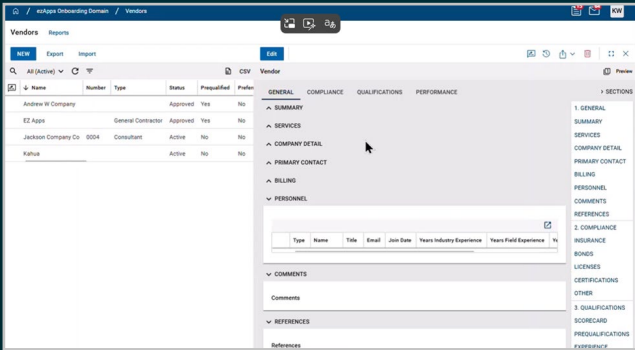

Assess vendor capabilities, manage compliance, and track performance in Kahua using configurable, template-driven workflows. Reduce costs, enhance communication, and ensure compliance while minimizing reliance on third-party services.

Thoroughly vet vendors to better understand their experience, skills, knowledge, and capabilities.

Verify experience and maintain records of previous work

Evaluate vendor performance on contracts
